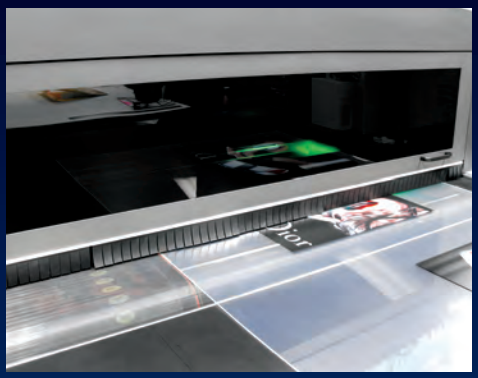
PLASKOLITE



Discover an acrylic sheet that doesn't require an adhesion promoter prior to ink application.

Often, printers sacrifice the outstanding optical clarity of acrylic sheet for the good UV ink adhesion properties offered by other plastic sheet substrates.

Not anymore! With Optix® DA, the time-consuming task of applying an adhesion promoter isn't necessary. You can produce high-quality, vibrantly colored prints utilizing UV digital flatbed technology, without the costly pre-press treatment – saving you time and money!

Optix® DA (Digital Acrylic Sheet)

- Designed as the perfect acrylic sheet for flatbed digital printers that use UV curable ink technology.
- Produced with a specially formulated acrylic polymer that promotes optimal adhesion of UV curing inks without the need for an adhesion promoter prior to ink application.
- Developed and tested with a leading manufacturer of digital UV flatbed printers and various ink suppliers.
- Available in Clear, 7328 White and Non-Glare.

Contact Plaskolite for thickness and size availability.
