

INTRODUCING OPTIX PURGE

OPTIX-PURGE

When utilizing extruders or injection molders, it is a common best practice to purge the material in between polymer change overs, color changes and beyond to reduce contamination. This is why we are introducing our newest product, OPTIX-Purge. OPTIX-Purge, made from 100% cast acrylic, was developed to reduce downtime between production runs, ensuring the following:

- » Elimination of material contamination and black specks
- » Flushing out material changes between colors to eliminate residual color

This economical solution is in stock and comes in two packaging options:

- » 1500 LB gaylord
- » 300 LB drum

REACH OUT TO YOUR SALES REPRESENTATIVE FOR MORE INFORMATION.

SUGGESTED PROCEDURES FOR EXTRUSION & INJECTION MOLDING ARE AVAILABLE UPON REQUEST.

These suggestions and data are based on information we believe to be reliable. They are offered in good faith, but without guarantee, as conditions and methods of use are beyond our control. We recommend that the prospective user determines the suitability of our materials and suggestions before adopting them on a commercial scale.
