

REFLECTS MORE THAN 75% OF INFRARED RADIATION PRESENT IN SUNLIGHT

IR REFLECTIVE SHEET REDUCES HEAT TRANSMITTED THROUGH WINDOWS AND SKYLIGHTS IN THE SUMMER AND ELIMINATES HEAT LOSS IN WINTER

- » Specifically designed for skylights, windows, doors and partitions
- » Lower energy costs
- » Iridescent effect complements modern design architecture
- » Transforms from serene blue to glistening gold based on the angle of light
- » Lighter and more durable than glass
- » Protects furniture and design elements from fading
- » Made exclusively with Lucite® monomer
