

TUFFAK[®] LUMEN XT – CUSTOMIZED LED LIGHTING FOR FUNCTION AND AESTHETICS

APPLICATION: CUSTOM LED CLUB LIGHTING SYSTEM

When envisioning the club level facility, the designers' intent was ribbons of light. The unique LED lighting system for the newly constructed US Bank Stadium created an eye-catching, dimmable light system that would contribute to guest satisfaction and their experience.

The intricate light fixture, set against a blacked out ceiling, was chosen to minimize its appearance so only the lens would be visible. Incorporating TUFFAK Lumen XT into the lens allowed for very close placement to the LEDs while retaining minimal fixture thickness, eliminating hot spots on the lighting surface. From full illumination to dimmed lighting levels the lens surface remains evenly illuminated.

TUFFAK Lumen XT

- » Superior impact strength and durability
- » High flammability resistance
- » Wide range of standard diffusion levels as well as both a warm (LW) or a cool (LC) hue offers designers the flexibility to maximize light fixtures' aesthetics and performance
- » Other surface textures are available for additional design options
