RE: European Chemicals Agency's (ECHA) Registration, Evaluation & Authorization of Chemicals (REACH) (EC 1907/2006) and Substances of Very High Concern (SVHC) Plaskolite Polycarbonate Sheet Products

To Whom It May Concern:

Plaskolite's polycarbonate sheet products (e.g., Tuffak®, Hygard®) are "articles" according to Article 3(3) of REACH, which the regulation defines as "an object which during production is given a special shape, surface or design which determines its function to a greater degree than its chemical composition".

To the best of our knowledge, concerning product composition including supplier information, Plaskolite's polycarbonate sheets do not contain any substances on the most current Candidate List for inclusion in Annex XIV of REACH/SVHC above the threshold level of $\geq 0.1\%$ by weight of the article.

The information presented herein is believed to be factual and reliable. It is offered in good faith, but without guarantee, since conditions and methods for the use of our products are beyond our control. We recommend that the prospective user determine the suitability of our products and these suggestions before adopting them on a commercial scale.

We hope that this information is useful to you and provides clarity on Plaskolite's compliance with REACH/SVHC. Please contact us at (800) 848-9124 if you have any questions related to this matter.

Sincerely,

Plaskolite Product Support Team
